Outdoor Use

Painting with WB Finish or other protective jacketing is required to prevent damage to the insulation in exterior applications and to comply with the insulation protection sections of the International Energy Conservation Code (IECC) and ASHRAE 90.1.

¹ AP Armaflex meets CAN/ULC S102 through 1" thickness.

² AP Armaflex and AP Armaflex FS Black Duct Liner/Wraps withstand temperature of 250°F [121°C] when tested according to ASTM C 411. "Test Method for Surface Performance of High-Temperature Insulations". At this temperature, AP/ Armaflex Duct Liner/ Wrap insulation shows no evidence of flaming, glowing, smoldering, delamination, melting or insulation collapse. Although this insulation will withstand high temperatures, continuous use temperature should be limited to 180°F [82°C].

³ At temperatures below -20°F (-29°C), elastomeric insulation starts to become less flexible. However, this characteristic does not affect thermal efficiency and resistance to water vapor permeability of Armaflex insulation.

⁴ For applications of -40°F to -297°F [-40°C to -183°C], contact Armacell.
