

**DESCRIPTION/SPECIFICATIONS**

RPR Products manufactures 4" Box Rib from a rolled process which forms a continuous pattern of 1" high ribs on 4" centers, engineered for maximum structural stiffness. The 4" Box Rib is an industry standard used in industrial applications.

- Alloys: T3004/7072 Alclad\* and 3105 Non-Alclad
  - Stainless Steel and Galvalume are available upon request.
  
- Finishes: Stucco Embossed
  
- Thicknesses: Aluminum - .032", .040", .050"
  - .024" (38 1/2" Widths only)
  
- Widths: 38 1/2" (36" Coverage)  
 45 5/8" (44" Coverage)
  
- Lengths: 3' to 30'
  
- Colors: Painted material available upon request (minimums apply)

\*Alclad aluminum is a composite, of 7072 aluminum alloy and a T3004 alloy, formed by a metallurgical bonding process. The 7072 aluminum is applied to both sides of an alloy T3004 Core. This process is designed for superior corrosion resistance.
